## Correction to: *Translational Psychiatry*

<https://doi.org/10.1038/s41398-018-0150-6>  
published online 18 May 2018

In the original Article, GWAS analysis of the UK Biobank data was based on standardised SNP dosages (standardised by their standard deviation) as opposed to raw SNP dosages. The standard error-weighted meta-analysis of the UK Biobank data with the IGAP findings was

therefore incorrect. The meta-analysis has been re-run as previously specified (the key findings remain although four new genome-wide significant loci have been identified). There have also been updates to the Supplementary Tables and Fig. 1.
